

D-Star Starter

With the wide spread use of D-star we felt the need put up our own OMIK Xreflector XRF185 (internet repeaters). It has been up since mid July 2015.

We also have the use of XRF748 and XRF295. They've been up since February and experiencing heavy use, they are owned by N5TAM Digital Amateur Radio Club who makes them available for use by others.

Here's a update on the Xreflectors XRF185, XRF295 and XRF748 and how to add them to your computer, Windows tablet or Raspberry PI.

Xreflector Name	Dashboard	IP Address
XRF185	xrf185.dyndns.org	104.167.117.71
XRF295	xrf295.dyndns.org	104.167.96.2
XRF748	xrf748.dyndns.org	104.167.109.27
